This is in response to the notification of the meeting about water levels declining.

My husband and I are in support of restrictions on farming and additional acres of agriculture. The misuse of water supplies to support excessive water usage for agricultural projects at the risk of depletion of the residential water supply is a travesty. Additionally, we support INA.

Please take actions to protect residential water usage.

Additionally, I am disappointed that the notification for the September 20th meeting was not delivered to my home until September 16. The notification period was not adequate.

Thank you.
