Attn: Sharon Scantlebury

I've been a resident of Kingman Arizona since 2008. I currently reside at [REDACTED] [Kingman Arizona](#). I watched the presentation at the Mohave county Water resources meeting , for the public. With our water aquifer being depleted at a faster rate then it is replenished and our decades long drought getting worse, I can only draw one conclusion. You must put a cap on a water resources for New industrial sized agriculture. I am writing to let you know that I believe that we do need and I support a "INA" for Mojave county.

Sincerely Stephen Redman
