We are new to Kingman and wanted to hear about the water issues, so we attended the meeting. So happy we did! We are in favor of the INA. I appreciate the local farmers doing all they can do with updated technology in order to save on water consumption, but I still feel that their water intake should be monitored. Just to make sure that they are aware, not wasting, and can do whatever they can do conserve.

The other thing that I want to say, and I apologize if I mis speak, but I have heard that there are SAUDI ARABIA owned land in our state. They are farming this land and then shipping the crop to their homeland for animals there. I am SO OPPOSED TO US SELLING OUR LAND TO FOREIGNERS!!! They don't care if they pull all the water out of our land. They will leave the land baren when the water disappears and go home. After the meeting, I was to understand that Kingman doesn't have any land owned by a foreign country, which makes me happier. For me, the fact that we are selling land in North Dakota to China is just UNCONSCIONABLE!!

Thank you for letting me say my piece. I look forward to the next meeting.
