To whomever it may concern,

I think it would be a wonderful idea for the Arizona Department of Water Resources to designate the Hualapai Valley Groundwater Basin as an Irrigation Non-Expansion Area. This would be a fair and reasonable solution for all of the residents of the surrounding area and would ensure that we have plenty of water for years to come. It does not seem fair that the biggest majority of water is being used for commercial purpose, and then the agriculture is shipped and sold abroad. Not only is the water being used by big business, the residents are getting nothing in return. To be honest, even if we were receiving compensation, it would do us no good. It doesn't replace the water that is being taken and that is so important to us and our future generations.

Thank you.

Sincerely,

Holly Swick
