To whom it may concern,

My wife Janette Ponce-Perez as well as myself Omar Ponce and many others in our community are in opposition to irrigation on new acres using our water source. Due to the following reasons; 1. The ground water is not being replenished at the same rate that it is being drained (used) to begin with. 2. We live in a desert, water is our most important need. 3. Financially, this does not make sense to us, why would we pay more so others can make more money? Specially in this economy. 4. If we run out of water, our city will disappear and you will lose your job along with all of the other personal that works alongside you!

Thank you,

Omar Ponce
