Dear ADWR,

My name is Edward Swapp and I am a relatively new move in to Mohave County. We have loved the beautiful desert surroundings and the temperate climate (in the winter ☺). We have two sons and their families who live close by, a total of 12 grandchildren, who are flourishing in school and in community sports. Together, we all wish to make Kingman our home for the future and hopeful that some of our grandchildren will desire the same. Obviously, water is critical to the long term prospects of our family. We have all taken measures to be water wise and conserve this precious resource. The area is growing rapidly and without sound water management it could lead to disaster. I attended the meeting held on November 12 at the Mohave County Administrative Building and I am truly concerned about the sustainability of our water resources in the years to come if conservation measures are not adopted. Therefore, I wish to state in the strongest possible terms that an INA is vital to preserve the water resources for the citizens of the greater Kingman community. Realizing that our water resources are being used to grow crops for foreign and multinational corporations at the risk of jeopardizing the future of this county is truly concerning.

Thank you for your efforts and please help us in Mohave County.

Sincerely,

Edward Swapp
