Total Land Subsidence in the McMullen Valley, La Paz and Maricopa Counties
Based on Envisat Satellite Interferometric Synthetic Aperture Radar (InSAR) Data

Time Period of Analysis: 1.0 Years 02/14/2008 To 01/29/2009

Explanations:
- **Decorrelation/No Data** are areas where the phase of the received satellite signal changed between satellite passes, causing the data to be unusable. This occurs in areas where the land surface has been disturbed (i.e., bodies of water, snow, agriculture areas, areas of development, etc).
- Earth fissures were mapped by the Arizona Geological Survey. For information on earth fissures visit: [www.azgs.az.gov/EFC](http://www.azgs.az.gov/EFC)

Coordinate System: NAD 1983 UTM Zone 12N
