I believe ADWR has circumvented the role of the Pinal GUAC as staff has "pushed" the draft 4MP through the process. While this might serve to hustle the 4MP forward, it is propagating mis-trust, resentment, and frustration, not only with the GUAC but also with the regulated community as a whole. I don't believe this fits the State's model for doing business and suggest you amend the approval process to make it inclusive and involve all stakeholders.

I previously made written comments on the 4MP in a letter dated July 6, 2020, addressed to Director Buschatzke, and ask that they also be considered.
