To Whom it May Concern:

On behalf of the Southern Arizona Home Builders Association, I would like to thank you for the opportunity to allow stakeholder input and comment on the Tucson AMA 5th Management Plan. SAHBA and our members support efforts to effectively manage our state’s precious water resources understanding the varying needs in each AMA. As Arizona continues to be a leader in expanding employment opportunities and attracting economic investment, it is critical that we have Management Plans that ensures sufficient water to maintain economic growth. Home building, development and construction has been integral in meeting the housing needs of current and future residents while contributing billions of dollars that benefits local economies around the State. We support the decision by ADWR to remove the updated language in the Recharge and Recovery requirements from all 5MPs. We encourage you to work with key stakeholders, including CAWCD/CAGRD and representatives of the homebuilding industry, in finalizing those specific requirements and the 5th Management Plan.

Respectfully,

David Godlewski
