Service Area Right Relinquishment Notice

Active Management Area: _____

I (we) _____

hereby permanently relinquish Service Area Right No. 56-_____, which is currently associated with the following well(s):

Well Registration Number(s) 55-_____ 55-_____ 55-_____ 55-_____.

(List additional wells on separate page if necessary). I (we) further understand that water may be withdrawn from these wells only pursuant to another groundwater right, a withdrawal permit, or a recovery well permit, or if the wells qualify as exempt wells pursuant to A.R.S. § 45-454. I (We) understand that all rights and interests associated with said service area right will also be permanently relinquished.

I (we) further do hereby certify, under penalty of perjury, that the current status of the well(s) listed above is as stated on the attached page (Attachment A, Well Status Update form)

Attachment A – Well Status Update form

Definitions:

- A ***non-exempt well*** is one equipped with a pump with a maximum capacity of more than 35 gallons per minute. Water withdrawn from a non-exempt well in an Active Management Area must be pursuant to a groundwater right or withdrawal permit or a recovery well permit.

- An ***exempt well*** is one equipped with a pump with a maximum capacity of 35 gallons per minute or less, and meets all requirements of A.R.S. § 45-454. If the well is to be converted from non-exempt to exempt, please also file DWR Form 55-71a, *Request to Change Well Information*, and provide documentation of pumping capacity of the well.

- ***Abandonment*** involves permanently filling or sealing a well to prevent the vertical movement of water. Abandonment must be performed by a driller licensed by the Arizona Department of Water Resources.

- ***Capping*** involves installing a temper-resistant, watertight steel plate of at least ¼ inch thickness on the top of all inside and outside casings of a well.
